

## Radio-controls with 4.5 million billion combinations.

433.92 MHz rolling code system with self-learning function and sequential code for multiple insertion (Flor-sc).

**Ideal solution for the management of multi-use systems** with a unique and personal code: the self-learning receivers are able to receive and store up to 1020 codes.

Using the BUPC palm-top device, the **Flor-sc model** makes it possible to memorise entire packs in one operation, without even having to open them.

Rolling code transmission: **absolutely secure** because it's impossible to clone the transmitter.

**Self-learning function:** the codes can be entered at a distance with an authorised transmitter or with a programming button on the receiver while a Led displays the different functions.

**A drop in consumption** but greater independence. Low battery warning via Leds.

### The Flor-s system includes:

**Transmitters** with 1, 2, 4 channels.

Universal **receivers** with 1 or 2 channels, universal modular, plug-in or for universal outdoors IP53, with step-by-step, timer and anti-burglar functions.

The **aerial** can be incorporated in the Lucy flashing light or in the outdoor IP53 receiver, or fixed with a bracket.

Code	Description	Pc/Pack
<b>FLO1R-S</b>	1 channel	10
<b>FLO2R-S</b>	2 channels	10
<b>FLO4R-S</b>	4 channels	10
<b>FLO1R-SC</b>	1 channel with sequential code for multiple insertion	10
<b>FLO2R-SC</b>	2 channels with sequential code for multiple insertion	10
<b>FLO4R-SC</b>	4 channels with sequential code for multiple insertion	10

### Technical specifications

Carrier frequency	: 433.92 MHz ±100 KHz
Estimated range	: 150 - 200 m with a tuned aerial in a free area
Coding	: digital 52 bit (4.5 million billion combinations)
Power supply	: 12 Vdc + 20% - 40% with 23 A battery
Average absorption (mA)	: 25
Dimensions (mm)	: 72x40x15 h
